

RISHABH KAUSHIK

Software Engineer

+91 9654491622 rishabhkaushikcd53@gmail.com https://www.linkedin.com/in/rishabh-kaushik-/ Ghaziabad, India

SUMMARY

Software Engineer with hands-on experience in full stack and backend development through internships and academic projects. Strong foundation in Data Structures, Algorithms, Operating Systems, and Database Management Systems. Worked on live web and e-commerce applications using React, Node.js, Express, Java, and SQL/NoSQL databases. Contributed to backend services, REST APIs, and functional testing, improving application stability and performance. Seeking entry-level Software Engineer, Full Stack Developer, or Backend Developer roles.

EXPERIENCE

Associate Intern

Cosmic365

05/2024 - 11/2024

- Delivered contributions to **6+ live web and e-commerce projects** across **8 international teams**, supporting production-ready feature deployments.
- Translated **20+ business and product requirements** into functional application features, reducing rework and clarification cycles by **25%**.
- Supported **Node.js backend services**, monitored performance and uptime, helping sustain **99% system availability** in production environments.
- Executed **50+ REST API, manual, and functional test cases**, identifying **40+ defects** and improving release stability by **30%**.
- Resolved **30+ hardware, software, and network issues**, reducing internal IT downtime by **20%** through proactive troubleshooting.
- Assisted in configuring and maintaining **routers, switches, firewalls, backups, and disaster recovery**, ensuring **100% data security compliance**.
- Completed **100+ SMART learning sessions** with mentor reviews, strengthening problem-solving, collaboration, and software development best practices.

EDUCATION

B.Tech in Information Technology

Netaji Subhas University of Technology (West Campus)

08/2018 - 07/2023 New Delhi

PROJECTS

Learning Management System (MERN Stack) | MongoDB, Express, React, Node.js

https://github.com/Rishabhkaushikcd53/LMS-APP

- Developed a full-stack LMS supporting course management, user roles, and scalable content delivery.
- Implemented JWT-based authentication and REST APIs, ensuring secure access and reliable system performance.

Banking Application | Java, SQLite, Firebase

https://github.com/Rishabhkaushikcd53/BankingApplication

- Built a secure banking system enabling account management, transactions, and role-based access control.
- Integrated SQLite and Firebase Authentication, ensuring data integrity, secure storage, and authorized access.

Instagram Clone (Android) | Java, Firebase

https://github.com/Rishabhkaushikcd53/InstagramCloneApplication

- Developed an Android social media application with real-time posts, authentication, and profile management.
- Optimized UI rendering and database queries, reducing application latency by 40%.

CPU Scheduling Algorithm Application | C++

https://github.com/Rishabhkaushikcd53/CPU-scheduling-ALgo-s

- Implemented 7 CPU scheduling algorithms using optimized data structures for accurate process scheduling.
- Leveraged queues, priority queues, and arrays to improve execution efficiency and system performance.

LANGUAGES

English Proficient German Advanced

KEY ACHIEVEMENTS

Institute Rank 27 on GEEKSFORGEES.

Solved 500+ DSA problems across GFG, LeetCode, and Coding Ninjas.

Represented the institution in football for 2 consecutive years.

CERTIFICATIONS

The Complete 2024 Web Development Bootcamp
Udemy (62 hours)

Mastering Data Structures & Algorithms using C and C++
Udemy

SKILLS

Programming Languages and Problem Solving

C, C++, Java, Python, JavaScript, SQL, Data Structures, Algorithms, Object-Oriented Programming (OOP), Problem Solving, Competitive Programming

Frontend Development

React.js, HTML5, CSS3, JavaScript ES6+, Responsive Design, Component-Based Architecture, State Management, UI Optimization, Cross-Browser Compatibility, REST API Integration

Backend & API Development

Node.js, Express.js, RESTful APIs, JWT Authentication, MVC Architecture, Backend Logic Design, Server-Side Rendering Basics, API Testing, Application Security, Performance Optimization

Databases & Data Management

PostgreSQL, MongoDB, MySQL, SQLite, Firebase, Database Design, CRUD Operations, Query Optimization, Indexing, Data Integrity, Backup & Recovery

Tools, Platforms & DevOps

Git, GitHub, Docker, CI/CD Fundamentals, Linux Basics, Version Control, Debugging Tools, Code Reviews, Deployment Workflows, Agile Development

Core Computer Science & Systems

Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Software Engineering Principles, System Design Basics, Networking Fundamentals, Infrastructure Support, Troubleshooting, QA & Functional Testing
